## I N T R O D U C T I O N

This report summarizes 1985 traffic volume and vehicle miles of travel on Montana's Federal-aid Highway Systems. Average daily traffic volumes on the rural interstate and primary systems are classified into categories of all vehicles and commercial vehicles.

Comparisons are made with traffic volumes for the years 1983, 1984 and 1985, for each section of the Federal-aid System. Pickups are included in passenger cars in order to show a more realistic picture of travel by the heavier commercial vehicles.

Some of the more important comparisons of travel on Montana's Federal-aid Systems are shown in the following tabulations.

Travel by commercial vehicles decreased 11.2% on the combined rural Interstate and Primary Systems from 1984 to 1985. The Interstate System, which consists of about 17.8% of the total primary mileage, carries approximately 37.2% of total traffic and 47.6% of the commercial trucks that traveled on Montana Interstate and Primary Systems during 1985.
